

ADDENDUM #1

RFP [012013](#)

Bay County

Aerial Application Proposal

Turboprop Fixed Wing

THOMAS HICKNER
BAY COUNTY EXECUTIVE

This addendum is being issued to amend certain bid requirements.

Under number four (4) "Requirements of Bidder" the following requirements have been waived:

1. Letter "d" Congested Area Plan, it has been brought to the attention of the County that this plan must be submitted to the FAA just before the spraying season has begun. It is our understanding that this plan is requested after the location of the spray area which is determined after tests have been conducted locating the heaviest concentration of mosquito larvae.

Based on this information this plan will be required after the contract has been signed and before spraying is to commence.

2. Letter "e" Ship/Aircraft Radio Station License, it has been brought to the attention of the County that this license is no longer required.
3. Bay County recognizes that licenses will expire at the end of 2013; therefore, the expectation is the vendors will have licenses renewed in 2014. Please include current copies of all requested licenses.
4. Bay County, due to this addendum, has extended the bid opening to Friday, July 12, 2013 at 10:00 am.

If you have any questions concerning this addendum or RFP 012013 please send them to my attention at mooref@baycounty.net.
