**Number of Mental Health Providers to Patients -  
2011**

# Comments From Focus Groups

---

“From everyone I have talked to, this area is lacking a severe amount of psychologists, psychiatrists.”

-Mother

“I see a lot of our students facing adult issues in the home. Kids who are exposed to alcohol, drugs; not only just the product but the environment of a home of an alcoholic or an abusive parent.”

-Teacher/Administrator

“Self worth being low and these aren’t completely independent of each other because obesity and self worth are strongly correlated too.”

-Teacher/Administrator

# Comments From Focus Groups

---

“I don’t see a whole lot of value in just pointing fingers at the parents and we have an opportunity to positively affect the kids and we have more hours a day with them than most of their parents do. So I'm gonna go ahead and say I'm not happy with the way we're handling them during our time.”

-Teacher/Administrator

“Nor do I feel our staff is well trained to handle situations that we are given.”

-Teacher/Administrator

# Upcoming Presentations to the Board

- **December**

- Morbidity and Mortality
- Bay County Priority Areas
- Update on Community Health Improvement Plan

Thank You!
