The Mid-Michigan Section of the Society of Women Engineers presents,

Engage in Engineering for girls!

One-day summer camps for middle school girls in Midland, Bay City, and Saginaw.

Activities Include:

Girls will design or improve an everyday object or instrument and print it out on our 3D printers. They will also build small products via an assembly line and build a robotic hand!
*Lunch, morning and afternoon snacks are included!

Girls in 6th – 8th grades welcome!

Be an engineer for a day. Participating in a one-day summer camp will allow girls finishing the 6th through 8th grades to solve real world problems through engineering. By demonstrating the excitement of engineering, SWE volunteers will help the girls to recognize the importance of math & science and hopefully spark an interest in a STEM career. Not only does this work to spark their interest in engineering, it also serves to build their confidence in a technical field and create a network with others excited about engineering. For more information, please email us at: Mid-michboard@SWE.org.

Thank you to all of our sponsors:

Dow Corning Foundation
Society of Women Engineers
ExxonMobil Foundation
SC Johnson
Solidoodle
BAISD
