DEFINITIONS OF CREATED VARIABLES

EDUCATION

H.S. Grad

Respondents with no more than a high school diploma.

Post-H.S.

Respondents with some post high school education, such as technical or vocational school or some college education.

Non-college grad

Respondents who do not have a college diploma.

College graduate +

Respondents with at least a college degree.

4-year college grad

Respondents who indicated that they have no more than a college education.

Post-graduate

Respondents who earned an advanced degree.

REGION

East Bay City

Respondents who live in Bay City, with zip code 48708

West Bay City

Respondents who live in Bay City, with zip code 48706

Rest of County

Respondents who live in Bay County, in the following Cities: Auburn, Bentley, Kawkawlin, Linwood, Pinconning, University Center, Essexville, or Munger

SURVEY METHODOLOGY

Lake Research Partners designed and administered this survey that was conducted by telephone using professional interviewers between January 17-22, 2012. The survey reached a total of 505 Bay County Residents, using both landline and cell RDD samples.

The samples were stratified geographically by city based on the proportion of members in each city. The data were weighted by gender, region, race and age.

In interpreting survey results, all sample surveys are subject to possible sampling error; that is, the results of a survey may differ from those which would be obtained if the entire population were interviewed. The size of the sampling error depends upon both the total number of respondents in the survey and the percentage distribution of responses to a particular question. For example, if 50% of respondents answered “Yes” to a particular question, we can be 95% confident that the true percentage will fall within 4.4% of this percentage, or from 45.6% to 54.4%. The table below represents the estimated sampling error for different percentage distributions of responses. Of course, the sampling error for sub-groups is greater.

**Margin of Error
for Different Percentage Distributions and Different Sample Sizes
(95% confidence)**

Sample Size	PERCENTAGES NEAR								
	10	20	30	40	50	60	70	80	90
