

16th Annual Ed Golson Earth Day Event

The 16th Annual Ed Golson Earth Day Event will be held on Saturday, April 17, 2010. The event will take place at the Veterans Memorial park boat launch parking area starting at 8:00 a.m.

The city will provide 500 yards of free compost for area residents for their growing season needs.

Little League players will be on site to provide assistance to our senior and disabled citizens. In addition, players will be collecting optional donations at the gate, with all proceeds going toward their utility expenses. We encourage everyone to help support our environment and our little league program in Bay City.

For those who miss this opportunity, the city has compost available for sale and can call the Sanitation Department at 989-894-8312 for further information.
