# TESTING
DOES NOT CHANGE HOME TREATMENT

Limited testing is currently available for:

those with doctors' orders **hospitalized patients** **healthcare workers** **first responders**

If you are feeling anxious about not being able to get tested for COVID-19, **please remember that testing *DOES NOT* change the treatment.**

Per Governor Gretchen Whitmer's order passed on March 23, 2020, all Michiganders must remain at home as much as possible. **If you are sick and it is an emergency, call your provider's office or hospital before you go in.**

If you are feeling symptoms related to COVID-19 you should: **1) Stay home!**

↳ commonly includes fever, dry cough & shortness of breath

2) Separate yourself from other household members and **stay in home isolation until 3 things have happened:**

At least 7 days have passed since symptoms first appeared.

Have been fever free for 72 hours (3 days) without use of medication

Other symptoms have improved, such as cough or shortness of breath

ISOLATION
For people who are ill.

VS.

QUARANTINE
For people who have been exposed.

- Separates people who have a very contagious disease from those who are healthy.
- Restricts the movement of people who have contagious disease to stop the spread of illness.

- Applies to people who are not yet ill, but have been exposed to very contagious disease.
- Applies to the separation and restriction of movements of people.
- Is a public health strategy to stop the spread of very contagious disease.
