

# Bay County Gypsy Moth Suppression Program 2020 Spray Block

## Total Acres to be Treated 381 acres

In fall of 2019, the Bay County Gypsy Moth Suppression Program conducted over 450 field surveys to determine the gypsy moth population density throughout Bay County. One (1) site in Gibson Township was found to have over 650 egg masses per acre, well over the 300 egg masses per acre threshold set by our program to trigger treatments.
