

## Is My Medical Marijuana Stored on the Safe Side?

Medical marijuana should be stored like any other medicine to keep it inaccessible from children (especially teenagers) and pets.

Safe storage ensures that the patient is receiving their medication. Furthermore, proper storage inhibits mold and bacteria growth that may negatively impact health.

### Medical Marijuana Safe Storage Checklist

My medical marijuana is...

- In child-resistant packaging
- In a clearly labeled medicinal container
- In a locked cabinet or lockbox
- In the trunk while I am driving
- In a cool, dark place
- In a dry place
- In an airtight container
- Out of direct sunlight
- Away from heat sources
- In a glass or plastic container, not a plastic bag

**Remember:** Use it responsibly, and store it responsibly, for yourself and others.
